Cask has a big influence in every whisky, because the long maturation takes place. A type of Sherry casks that is highly regarded, is Oloroso. Sherry Casks became rare because it did not catch the imagination of drinkers in the later 20th century. And the rarity makes it more expensive nowadays, compared against the readily available Bourbon Casks.

The difference between Islay and Highland Peat

Peat is vegetation which has been broken down over hundreds of thousands of years in waterlogged conditions. Traditionally in Scotland, it has been dried out and used as a fuel source, to heat homes, and to make whisky.

The flavours which are imparted by the peat during the malting process, depend on where the peat is sourced. In coastal regions, such as Islay, there is a lot of seaweed in the composition of this peat, which can translate to medicinal notes in whiskies. In more inland regions there is no seaweed so the peaty aromas are more akin to campfire smoke.

Campbeltown used to be the whisky capital of Scotland, with 29 distilleries in its heyday. The Kintyre Peninsula, where the town is situated, has an abundance of the ingredients needed for whisky production, namely water and fertile lands for growing barley. In 1923 the Drumleble Colliery closed down leading to the end of a cheap fuel source for the distilleries. This, paired with prohibition and The Great Depression, meant that by 1929 there were only three distilleries left in Campbeltown. The style is traditionally fruity and salty with a distinctive west coast funk.

The 1925 Brewing Co. was founded in 2013 in Singapore, and remains proudly Singaporean till today.
